

LAKESIDE NORTH HARBOUR PORTSMOUTH

PROJECT:

Lakeside North Harbour

LOCATION:

Portsmouth, United Kingdom

MAIN CONTRACTOR:

Bouygues Ltd

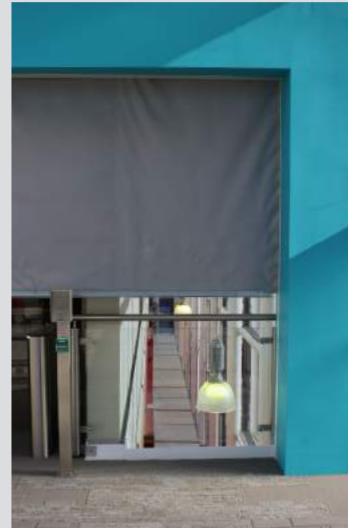

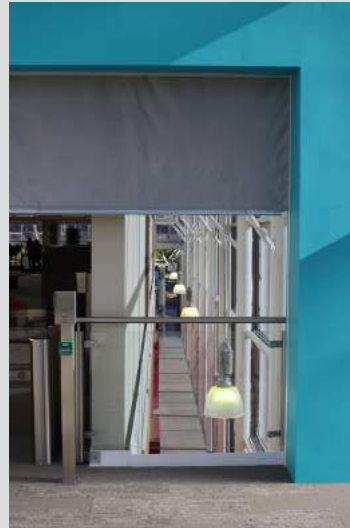

COLT PRODUCT:

*Fm I Fire Curtain
SKC Control system*

Colt designed, supplied an installed a 17 meter FMI fire curtain to the newly refurbished Lakeside North Harbour office hub in Cosham, Portsmouth.

During the refurbishment of the business hub at Lakeside North Harbour, Colt were brought in to design, supply and install a 17 meter long fire curtain to the main foyer area, thereby blocking fire and smoke in the event of a fire.

The curtain is controlled by Colt's SKC smart control system, allowing the FMI to integrate with the smoke control and fire management scheme, with emergency power units and the facility to interface directly with a fire alarm system.

When inactive, the FMI curtain is discreetly hidden into the structure of the building to blend sympathetically with the architects vision.

Colt were able to provide a quick turnaround of 7 weeks, which suited the main contractor's time sensitive schedule. In this instance, Colt's Havant office was also able to provide quick response due to its proximity to the site.
